

**Remarks/Arguments**

The present amendment is made in response to the Office Action dated August 31, 2004, and identified as Paper No. 83004. Claims 1-21 are pending in the application

In the Action, The Examiner rejected claims 1 and 6 under 35 U.S.C. § 102(b) as anticipated by U.S. Patent No. 6,308,420 to Moser ("*Moser*"). Claims 1-6, 11, and 15 were rejected under 35 U.S.C. § 102(e) as anticipated by U.S. Patent No. 6,732,436 to Moizis ("*Moizis*"). Claims 7-10 were rejected under 35 U.S.C. § 103(a) as obvious over *Moizis*. Claims 12-14, and 16-21 were objected as dependent upon a rejected base claim, but allowable if rewritten in independent form.

With regard to the rejection of the claims in light of *Moser* and *Moizis*, independent claim 1 has been amended to recite that the camming surface has an arcuate portion substantially coaxial with said pivot axis that is eccentric relative to and extending between rounded ends. Both *Moser* and *Moizis* use camming members which are round. Independent claim 11 has been amended to include essentially the same limitation, which was previously recited in claim 20. Although claim 20 was rejected, the claim was not specifically addressed in the Office Action, nor was the limitation at issue specifically considered by the Examiner. As the limitation is clearly not present in or suggested by the cited art, the claims are believed to be in condition for allowance.

With regard to the objections, claims 12 and 16 have been rewritten in independent form, thereby placing claims 12-14 and 16-21 in condition for allowance.

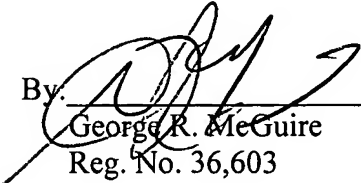

In view of the foregoing amendments, the Examiner's reconsideration and allowance of the present application is believed to be in order. If the Examiner believes a phone conference
